

KONICA MINOLTA

EDUCATION VIDEO SECURITY

WHERE ARE YOUR DEFICIENCIES?

OPTIMAL OVERSIGHT

Avoid blind spots and coverage gaps around hallway corners, athletic fields or small & large classrooms by knowing the field of vision your MOBOTIX cameras will provide. Improve oversight across your entire campus.

PARKING LOT SAFETY

Keep an eye on your parking lots to ensure staff, visitors and commuting students are in your view. Even in low-light — our high-resolution images and moonlight technology deliver unparalleled clarity from your well-positioned MOBOTIX cameras.

BULLYING PREVENTION

Monitor your school grounds and parking lots to detect unwanted confrontations between students. Ensure any private or restricted areas are not breached by unauthorized students or visitors with Heat-Mapping technology.

LITIGATION MITIGATION

With high-resolution images that deliver unparalleled clarity, you will clearly see interactions with the level of quality that your legal department needs to address campus altercations.

UNWANTED VISITORS

Set up real-time alerts on your security network to pre-empt theft, intruders, property damage & potential staff or student injury liability. Also, use your entrance cameras to capture any unauthorized parents or potential hostile situation.

PRESENT-DAY TECHNOLOGY

Upgrade legacy systems in your school district or across your campus and safeguard against unsecured camera 'backdoors' into your data. Use cloud for image storage and building a connected network you monitor from one dashboard.

KONICA MINOLTA

From bully prevention to campus/district security, Konica Minolta Video Security Solutions provide the data, clarity, reliability and flexibility that you need to respond to alerts, monitor student activity, provide internal & external security and employ the level of detection you need.
